

## Bus Service Review 2024

#

### Introduction:

- The bus network in Cheshire East plays a key role in providing access to jobs and services by connecting people to places.
- The local bus network is made up of 37 bus services, of which 21 services are fully supported by the Council (57%), a further 8 are partially supported by the Council (22%), such as evening journeys. 8 services (22%) operate on a fully commercial basis.
- This review looks for opportunities to encourage more bus use and get more supported services operating commercially, tweak services to improve performance and passenger uptake and get better value out of what the Council is spending.

### Objectives:

Maximise opportunities in areas of greatest need;

Ensure services complement, not compete with commercial services;

Develop stronger partnership working with commercial operators; and

Identify opportunities to modernise flexible on-demand transport options

### Summary of conclusions from data analysis:

- Nantwich rural services (70,72,73) and the Macclesfield-Poynton-Stockport (391/392) service are the lower ranking supported services.
- Parts of Poynton and Nantwich are identified as having limited accessibility to key service centres.
- Low levels of bus service provided during evenings and Sundays across the borough.
- Poynton is identified as an area with the potential for more people to use bus services if a better level of service was provided.
- Potential bus demand is also evident in locations at the edge of towns/villages e.g. around Nantwich, Alsager, Middlewich, Congleton and Wilmslow.
